

AP02 reserve compounds: potency and selectivity

BW25_0600 | Avernoelwick Pharmaceuticals Ltd | Client readout, 26 January 2026

Summary

- 24 reserve compounds tested in the Primary potency assay (10-point, ATP at Km)
 - Best IC50 8.7 nM
- Selectivity sweep at 1 μ M on six representatives against 16 off-target kinases
- Decision: Avernoelwick selected AP02-01430 for the next chemistry round (slide 7)

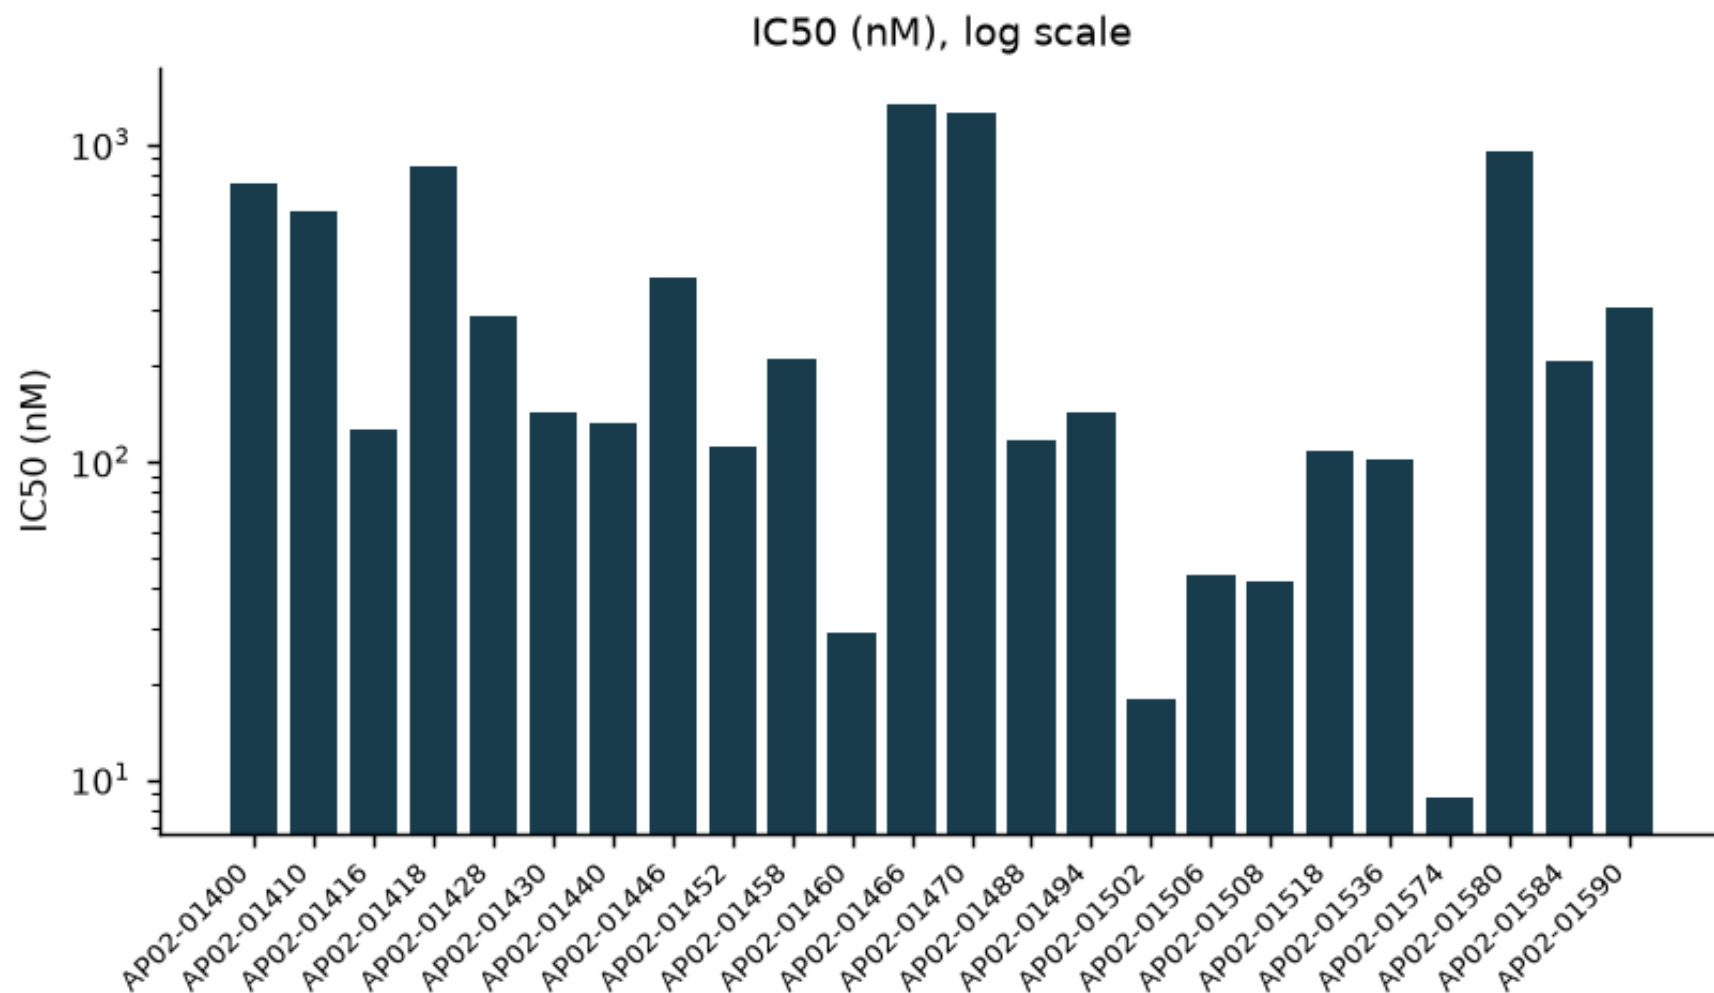

Plate acceptance

- Acceptance criteria as agreed in the study plan: Z' and staurosporine IC50 within the historical range on every plate
- All plates accepted; per-plate values are in the run sheets sent with this readout
- No compound flagged for signal interference in the counter-read

Ranking and decision

Compound	Off-target kinases >50% at 1 μ M	Decision
AP02-01430	1 (ABL1)	Selected by Avernoelwick: narrowest fingerprint and more potent of the two one-hit compounds
AP02-01410	1 (KDR)	Back-up: same fingerprint width, weaker primary potency
AP02-01416	4	Not progressed
AP02-01400	3	Not progressed
AP02-01418	6	Set aside: broad off-target inhibition
AP02-01428	6	Set aside: broad off-target inhibition

Next steps

- Avernoelwick confirmed AP02-01430 as the reserve for the next medicinal chemistry round (call, 26 January)
- AP02-01410 kept as back-up
- Optional: full concentration response on ABL1 for AP02-01430
- Contact: Dr B. Rowcroft, Screening Operations Director
