Osterquill Onboarding: Access Decision

Decision memo following completion of the acquisition

Report no. TG-HO-QA-2026-011

Date: 5 October 2026

1 Decision

The Osterquill archive remains outside the integrated group repository. No Osterquill share, mailbox or document store is connected to the group SharePoint, the group LIMS export or the group HR system at this stage. This decision applies from the completion date of 1 October 2026 and will be reviewed when the access and QA mapping is finished.

The decision was taken by the Group Quality Director after consultation with the Integration Director, the Group Chief Executive and the Osterquill site lead. It is recorded here so that the steering group can see the basis for it.

2 Background

Osterquill Toxicology Inc operates in vitro and in vivo toxicology under GLP at its Portland site. It is the seventh firm in the group and the first to bring a GLP in vivo practice into the group. Its study records are held under its own quality system, and some are subject to inspection obligations that run for many years after the study closes.

The group has not yet adopted any part of that quality system, and nothing in this memo should be read as a statement about its adequacy.

3 Reasons for holding the archive apart

- GLP records must keep their original audit trail, and copying them into a group repository risks changing the metadata that an inspector would check.
- Access rights on the Osterquill shares were set by the firm, not by the group, and we have not yet confirmed who needs to see what.
 - Some folders hold personal data relating to study staff and animal care personnel, which has not been classified against the group data rules.
- Leaver ownership has not been checked, so it is not clear who can approve a transfer of a folder.

None of these reasons is a finding against the firm. They are the conditions that have to be met before the archive can move, and they are the reason we are not moving it now.

4 Status of onboarding workstreams

Table 1 Osterquill workstream status at 5 October 2026

Workstream	Status	Note
HR and payroll	Not started	Staff directory and payroll interface not built; see the HR closeout for the A to F approach
Brand migration	Not started	Osterquill material keeps its own brand until the steering group decides otherwise
LIMS consolidation	Not started	Export mapping needs the GLP record structure, which has not been reviewed
IT and SharePoint migration	Held apart	Archive stays in its own tenant root; no new shares created
Access and QA mapping	In progress	Owned by the Group Quality Director; first pass due before any transfer

Payroll onboarding has not started and no date has been set for it. Any staff from Osterquill who need access to group systems in the meantime should be requested through the Integration PMO and approved one by one.

5 Conditions before transfer

The archive will not be considered for transfer until each of the following has been completed and recorded.

1. Access map of every Osterquill share, with the named owner of each folder.
2. Classification of any folder holding personal data, agreed with the group data protection lead.
3. QA mapping of the GLP study records, confirming the index, the audit trail location and the retention period for each study type.
4. Sign-off by the Osterquill site lead and the Group Quality Director that the transfer method preserves the original records unchanged.

The QA mapping is the critical path. The first pass is planned for the end of October 2026; the date for the second pass depends on what it finds.

6 Communication

Osterquill staff have been told that their existing systems stay in place and that no change to their working arrangements is planned in the next three months. Client-facing material from the firm keeps its existing brand line until the steering group decides otherwise.

The Integration PMO will publish a short update to the steering group once the access map is complete. No client communication about the archive is planned.

7 Actions

Table 2 Actions

Action	Owner	Due
Complete access map for all Osterquill shares	Yasmin Farhat	30 October 2026
Name leaver folder owners on the Osterquill shares	Integration PMO	30 October 2026
Agree data classification for personnel folders	Yasmin Farhat with the data protection lead	13 November 2026
Start payroll onboarding scoping	Nils Bergstrom	Not before the access map is complete

Name	Role	Signature	Date
Yasmin Farhat	Group Quality Director	<u>Y Farhat</u>	5 October 2026
Sofia Lindervik	Integration Director	<u>S Lindervik</u>	5 October 2026
