STABILITY REPORT: EP19 CAPSULE BLEND, LOT L02

Six-month accelerated data

Protocol: WA/2011/192

Client: Esmervane Pharmaceuticals

Report date: 07/05/2012

1. SCOPE

1.1 This report gives results for lot L02 of the EP19 capsule blend stored under the protocol conditions up to six months. Storage started on 07/11/2011.

2. RESULTS

2.1 Initial assay 99.4% of label claim. Results to 6 months are tabulated below.

Specification: assay 95.0-105.0% LC; any unspecified impurity $\leq 0.20\%$; total $\leq 2.0\%$

3. DISCUSSION

3.1 Assay and total impurities remain within specification at 25 °C/60% RH and 30 °C/65% RH. At 40 °C/75% RH the RRT 0.86 degradant increases with time, consistent with moisture-driven hydrolysis. 3.2 Conclusions are limited to the tested interval.
