

Tarnovell Bioscience Group

Board extract: local operations

Extract from the board pack, December 2021 meeting

Report no. TBG-BD-2021-12-04

Date: 15 Dec 2021

Prepared by: Dr E. Vellacombe, Group Chair

1 Purpose

This extract records the board's position on how the group's local operations are run now that the Tarnovell brand and group template are in use. It covers the operating model, the workstreams still in progress and the decisions reserved to the board.

Legacy records have not been restyled. Where a firm still uses its own template or project numbers, that is intended and is not a gap in the integration.

2 Operating model

The integration programme is called One Group, Many Practices. It is active. Local scientific operations are retained in each firm while shared processes converge on group standards.

- Scientific leadership stays with the local site head
- Shared services (finance, HR, IT, quality policy) are run from head office
- Commercial pricing is set centrally, with local discounts recorded as history
- Client-facing documents may use the common master from the date of brand migration

Each firm keeps its own accession and project numbering. The group does not renumber historical work.

3 Group history

Table 1 Group history to the brand launch

Year	Event
1994	Vellacombe Discovery begins as an independent medicinal chemistry laboratory
1996	Vellacombe becomes the platform for further acquisitions
2001 to 2019	Biology, DMPK, computational and analytical businesses join, each keeping its local scientific and filing practice
2019	Private equity investment funds the next phase and a common commercial identity
2020	The Tarnovell brand and group template launch. Legacy records are not restyled

4 Firms in the group

Table 2 Integrated firms at December 2021

Firm	Discipline	Site	Joined
A Vellacombe Discovery Ltd	Medicinal chemistry	Nottingham, UK	1996-04-01
B Brindlewythe Biosciences Ltd	In vitro biology and screening	Cambridge, UK	2001-07-02
C Merrivoss Bioanalysis Inc	DMPK and bioanalysis	Madison, US	2008-03-03
D Quenverell Computational Ltd	Bioinformatics and computational chemistry	Edinburgh, UK	2014-10-01
E Westravell Analytical Ltd	Analytical chemistry and stability testing	York, UK	2019-06-03

The five firms above are the group at the date of this extract. Firms A to E use the common master for client-facing documents.

5 Integration workstreams

The board reviewed each workstream against the December plan. Status is as reported by the workstream owners.

Table 3 Workstream status, December 2021

Workstream	Status	Position at this meeting
Price harmonisation	In progress	Three of five integrated firms mapped. Historical local currencies and discounts are retained.
Brand migration	In progress	Firms A to E use the common master. Some legacy signed records still carry earlier client names.
LIMS consolidation	In progress	Common export dictionary agreed. Local accession numbers are retained.
Cross-sell	In progress	Client identity bridge in progress. Subsidiary and lookalike checks are required before any joint approach.
HR and payroll	Complete	All five firms are in the consolidated directory. Leaver dates are recorded there.
IT and SharePoint migration	In progress	Local shares are kept as archive roots. Leaver folders need an owner check before they are moved.

6 Local scientific sign-off

The board confirmed that release of scientific reports stays with the firm's own quality lead. Group quality sets the common standard but does not sign individual reports.

Reports issued from a legacy template keep that template. Reissuing a historical report in the new brand needs the original signatory's agreement.

- Scientific sign-off: local quality lead
- Group policy and audit: Group Quality Director
- Commercial terms: Group Commercial Director, with local input

7 Reserved decisions

The following decisions remain reserved to the board and may not be delegated to a firm or to a workstream:

- Any change to the group template or brand standard
- Any change to shared-service ownership
- Acquisition or disposal of a firm
- Any move of a firm's historical records out of its local share

Other matters are delegated to the Group Chief Executive and reported at the next meeting.

8 Actions

Table 4 Actions arising

Action	Owner	Due
Complete price mapping for the remaining two firms	Group Finance Director	Q1 2022
Finish client identity bridge for the cross-sell pilot	Group Commercial Director	Q1 2022
Owner check on leaver folders before any move	People Operations Manager	Ongoing

Name	Role	Signature	Date
Eleanor Vellacombe	Group Chair	<u>E vellacombe</u>	15 Dec 2021
